DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 29-32, 34-36, 38, 40, 42, 44, 46, 49-57, drawn to nucleic acid, expression vector, host cell, antisense nucleic acid, pharmaceutical comprising nucleic acid.

Group II, claim(s) 33, 37, 39, 41, 43, 45, 47, 48, drawn to protein, pharmaceutical comprising protein.

Group III, claim(s) 58, 59, and 63, drawn to method of diagnosing cancer.

Group IV, claim(s) 60, drawn to method of detecting Down's syndrome.

Group V, claim(s) 61, and 62, drawn to method of detecting pathological pregnancy.

Group VI, claim(s) 64, drawn method of isolating DNA.

Group VII, claim(s) 65, drawn to method of treatment using nucleic acid molecules.

Group VIII, claim(s) 66, drawn to method of treatment using protein molecules.

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: PCT Rule 13.2 and 37 C.F.R. 1.475 define "special technical feature " as those technical features that define a contribution which each of the claimed inventions, considered as a whole,

Art Unit: 1642

makes over the prior art." 37 C.F.R. 1.475(d) states that, if multiple products, processes of manufacture, or uses are claimed, the first mentioned in the claims will be considered as the main invention, along with each of the other categories related thereto. The main invention is an isolated DNA sequence coding for oncofetal ferritin I. Moroz et al. (1989, Proc. Natl. Acad. Sci. USA, vol. 86, pages 3282-5, cited in the ISR) disclose an isolated nucleic acid encoding the oncofetal ferritin I; therefore, no special technical feature exists for Group I as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. Since the main invention lacks a "special technical feature," unity of between the protein and first method of use of the first product is lacking and restriction is proper. Note that PCT Rule 13 does not provide for multiple products or methods within a single application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
